

A Hi-Tech solution provider for most waste water problems

AIR CONDITIONING

Enviro Tablets™ Air Conditioning Tablets are the complete environmental answer to the problems associated with cleaning water based Air-Con systems especially the cooling towers,

They reduce, or eliminate F/O/G/ and all organic wastes in the tanks, pipes and cooling towers and reduce the down-time by helping to prevent water based breakdowns and maintenance callouts.

They condition the cooling water so that dangerous pathogens find it difficult to flourish and become a problem.

They also remove all the unpleasant smells associated with recycled water.

Initial treatments will require the use of our Boost Powder™

3rd generation biological products that contain blends of friendly aerobic bacteria and ingredients that have the

BENEFITS:

Digests all organic wastes ✓

Environmentally safe and friendly ✓

Neutralises all bad smells ✓

Cleans the whole system ✓

Helps prevent dangerous pathogens forming ✓

Helps prevent algae formation ✓

No need to use expensive harsh chemicals ✓

Proven to reduce/eliminate Listeria ✓

TABLETS AVAILABLE IN CONTAINERS OF 50

Enviro Tablets™ products provide an easily dispensed, environmentally friendly and effective solution

www.enviro-tablets.com 2016

Natural and environmentally safe & friendly bacteria based water treatment products

Other Applications

Grease Traps

Septic Tanks

Waste Water Treatment Plants

Aquaculture & Pond Maintenance

Industrial Food Processing

Marine Sewage Systems

RV Sanitary Systems

Commercial Toilets & Urinals

Car Washes

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems. **They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.**

The product range consists of our rapid acting Boost Powder™ and sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and “Active Oxygen” which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to decrease the acidity of the water.

About Us

Enviro Tablets™ is continually researching environmental solutions to solve pollution problems.

We are always looking for effective technologies that can be bought to market.

Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the UK and the USA.

WHAT MAKES US DIFFERENT

The built-in special “Active Oxygen” component boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
