

A Hi-Tech solution provider for most waste water problems

Industrial/ Food Processing

3rd generation biological products that contain blends of friendly aerobic bacteria and ingredients that have the following:

BENEFITS:

Digests all organic wastes & sludges ✓

Environmentally safe and friendly ✓

Neutralises all bad smells ✓

Cleans the whole system ✓

Prolongs tank and pipe life by reducing acid erosion ✓

Reduces pollution problems with the outflow water ✓

Saves time and costs. Easily dispensed. ✓

Eliminates blockages ✓

Enviro Tablets™ Industrial Products are the complete environmental answer to removing F/O/G/ and all organic wastes from Industrial waste water systems. They reduce, or indeed eliminate the need to manually clean, or pump out interceptor drains and tanks.

They also reduce, or eliminate the inevitable blockages that can occur in busy production lines.

Using these products ensures that your discharge water will be well above the standards set for BOD, COD, TSS, TDS and pH.

They also remove all unpleasant smells from the system.

Clients find that the need for maintenance manpower and harsh cleaning chemicals is reduced, saving time and money.

TYPICAL GREASE TRAP:

Simply drop tablet(s) into grease trap.
It's that easy!

Tablets are available in buckets of 50's
Boost Powder™ comes in 7kg buckets or
40g sachets

Enviro Tablets™ products provide an easily dispensed, environmentally friendly and effective solution

Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and “Active Oxygen” which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

Other Applications

- Grease Traps
- Septic Tanks
- Waste Water Treatment Plants
- Aquaculture & Pond Maintenance
- Cooling Tower Systems
- Marine Sewage Systems
- RV Sanitary Systems
- Car Washes
- Toilets and Urinals

About Us
 Enviro Tablets™ is continually researching environmental solutions to solve pollution problems. We are always looking for effective technologies that can be bought to market. Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the EU and the USA with a sales office in Asia.

*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

WHAT MAKES US DIFFERENT

The built-in special “Active Oxygen” component boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
