

Urinals

Enviro Tablets™ Urinal Powder is the complete environmental answer to all the problems associated with commercial urinals.

They reduce the need to manually clean them. They prevent the inevitable urea blockages that occur and remove the bad smells, especially urine. The Urinal Powder is dispensed by pouring a sachet into each urinal every week.

They reduce the frequency of flushing - saving water.
Ideal for septic systems.

A blend of friendly aerobic bacteria and natural ingredients that have the following:

BENEFITS:

Digests organic wastes ✓

Environmentally safe and friendly ✓

Neutralises all bad smells (even urine) ✓

Clears Urea deposits ✓

Prolongs pipe life ✓

Reduces water use ✓

Eliminates blockages ✓

Comes in 40g sachets, packs of 120's or 15's

Each sachet is effective for up to 2-3 times longer than a standard urinal block (with normal usage). Can be used in normal urinals and waterless urinals. Automatic urinal flushing can be dramatically reduced. Enviro Tablets™ product provides an easily dispensed, environmentally friendly and effective solution

Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and “Active Oxygen” which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

Other Applications

- Grease Traps
- Septic Tanks
- Waste Water Treatment Plants
- Aquaculture & Pond Maintenance
- Car Washes
- Cooling Tower Systems
- Industrial Food Processing
- Marine Sewage Systems
- RV Sanitary Systems

About Us
 Enviro Tablets™ is continually researching environmental solutions to solve pollution problems. We are always looking for effective technologies that can be bought to market. Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the EU and the USA with a sales office in Asia.

*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

WHAT MAKES US DIFFERENT

The built-in special “Active Oxygen” component boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
