

A Hi-Tech solution provider for most waste water problems

Waste Water Treatment Plants

3rd generation biological products that contain blends of friendly aerobic bacteria and ingredients that have the following:

BENEFITS:

Digests all FOG and organic wastes ✓

Environmentally safe and friendly ✓

Neutralises all bad smells ✓

Digests bottom sludges in the Primary ✓

Aids gas exchange in the secondary ✓

Reduces the need for aerators & skimmers ✓

Reduces corrosive gases & fluids ✓

Dramatic savings in energy/chemical costs ✓

Enviro-Tablets™ WWTF products are the complete environment answer to removing Fats, Oils, Grease, human solid wastes and organic sludges from commercial waste water systems.

Our 100% Natural bio-engineered tablets aid in the rejuvenation and boost the ecosystems in commercial water systems by removing fats/oils/greases, solid wastes, increasing the pH level and removing organic sludges – all without extra expensive chemicals.

We have developed this enhanced aerobic grease mitigation and digestion technology to address the challenges of older treatment plants, lift/pump stations and wet wells operating under a variety of conditions.

The product also successfully treats bottom sediment with its effervescent “Active Oxygen” action which stirs up the sediment so that the bacteria directly remediate it, this reduction of solids increases the plants ability to handle more incoming wastewater. Properly used, Enviro-Tablets™ provide a residual action throughout the whole treatment plant that removes anaerobic problems and keep the systems running at maximum efficiency. They also dramatically reduce, or eliminate, all H₂S.

Many European and US waste water treatment plants use our products on a daily basis. The products are safe to handle and require no specialised training or equipment. *(Please see the M.S.D.S.)*

WHAT TO EXPECT AFTER USAGE

TO SUM UP, YOU WILL NOTICE Much higher overall water quality, much reduced costs, higher level of dissolved oxygen in the wastewater, large reduction in BOD, COD, TSS, TDS, H₂S, toxicity and other wastewater parameters, greatly enhanced water clarity, complete oxidation of inorganic matter such as nitrites and sulphides, much better odour control, enhanced pH control, large reduction in Fats, Oil & Grease, virtual elimination of bottom sludge and improved water flow.

TABLETS AVAILABLE IN CONTAINERS OF 50's

Enviro Tablets™ products provide an easily dispensed, environmentally friendly and effective solution

www.enviro-tablets.com 2018

Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and “Active Oxygen” which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

Other Applications

- Grease Traps
- Septic Tanks
- Toilets and Urinals
- Aquaculture & Pond Maintenance
- Cooling Tower Systems
- Industrial Food Processing
- Marine Sewage Systems
- RV Sanitary Systems

About Us
Enviro Tablets™ is continually researching environmental solutions to solve pollution problems. We are always looking for effective technologies that can be bought to market. Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the EU and the USA with a sales office in Asia.

*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

WHAT MAKES US DIFFERENT

The built-in special “Active Oxygen” component boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
